

CRETE-HEAT

Insulated Floor Panel Systems

by

CRETE-HEAT™, LLC

Simplified installation of hydronic radiant floor heating systems

- Cuts radiant system install time by as much as 2/3
- Designed to hold tube securely in place with wider fasteners
- Three thicknesses are available for new construction and retrofitting existing buildings - 1", 2" and 3"
- Snowmelt option available in 2"
- Easy to assemble
- Vapor barrier and radiant tube holding grid
- Use in basements, garages, driveways, main floor slab on grade and above grade installations where concrete or gypcrete is normally used.

CRETE-HEAT™ BENEFITS

- Easy to move around site and store
- UV protected bags to protect the panels during storage outdoors
- Panels are easy to handle and lay flat
- Labor savings - One-person installation
- Tube spacing is exactly on 3" increments - 6", 9", 12" centers
- Tongue & Groove joints - No taping required
- Minimal Waste
- Faster than conventional stapling methods
